

## PUBLIC MEETING NOTICE

The City of Frankfort Sewer Department hereby gives notice of a Public Meeting to be held from 5:30 to 7:00 p.m. EST on Tuesday, January 8, 2013 at the Bellepoint Baptist Church located at 622 Kentucky Avenue, Frankfort, KY.

The purpose of the meeting is to inform the public of planned improvements to the wastewater collection system and allow the public to review and comment on proposed activities, potential impacts and project alternatives. Planned improvements include construction of a 10 Million Gallon Flow Equalization Basin and Pump Station planned to be located in the old soccer fields adjacent to the Frankfort Wastewater Treatment Plant (WWTP) located at 1200 Kentucky Avenue.

The Flow Equalization Structure is proposed to be an above ground concrete tank measuring 185 feet in diameter and 50 feet tall. The purpose of the Flow Equalization Basin is to hold excessive flow into the WWTP during heavy or prolonged rain events which will mitigate Combined Sewer Overflows (CSO's) within the collection system. Interested persons may come and go any time between 5:30 and 7:00 p.m. Information will be available at the meeting regarding the project description, environmental consequences and proposed mitigations. Written comments received by the Frankfort Sewer Department, 1200 Kentucky Avenue, Frankfort, KY 40601 by 12:00 p.m. on January 22, 2013 will also be addressed before the project starts construction.
