

Bacon Creek Watershed

Bacon Creek is located in the Upper Green River Basin within Hart, Larue and Hardin counties. The majority of the basin resides in Hart County. Bacon Creek, Honey Run, Tampa Branch & the Upper Tributary to Bacon Creek are all listed as impaired streams for the use of Primary Contact Recreation for *E. coli*.

Agricultural Needs

Do you own a farm in this watershed? You could be eligible for assistance with implementing Best Management Practices. Contact the Larue County Conservation District for more information.

Septic Needs

Do you have a septic system in this watershed that has not been inspected in the past 3 years? Or does it need to be pumped out or replaced? Contact the Barren River District Health Department for assistance in updating your septic system.

Join the Watershed Council

Learn more about the Watershed Council and come to the next meeting!

Environmental Education

Are you a teacher in this watershed that wants assistance with lessons about watersheds or water quality? Contact the Basin Coordinator to schedule a classroom visit!

Farm Field Day

Learn more about our last Farm Field Day and how you can plan one for your school!

Watershed Plan

Read through the Bacon Creek Watershed plan and learn how you can help improve water quality in your neighborhood.
